EDUCATION

University of Ghana – Accra, Ghana

Major: BSc. Computer Science (2024-2027)

Relevant Courses: Software engineering, Data structures and Algorithms, Statistics, Database Management, Computational Methods.

Ghana Secondary Technical School – Takoradi, Ghana

Program: General Science (2021-2023)

Electives: Elective Maths, Physics, Chemistry, and Biology.

SKILLS AND INTERESTS

- **Programming languages:** Python, JavaScript, SQL
- **Web technologies and frameworks:** React Native, HTML, Tailwind CSS, ReactJS, and Django.
- **Databases:** MySQL
- **Design Tools:** Photoshop, Figma

EXPERIENCE

DUAPA WORKSPACE (Software Developer Intern)

APRIL 2025 – MAY 2025

Takoradi, Ghana

- Improved communication, teamwork, and problem-solving skills.

- Learned how to operate effectively in a professional environment since it was my first internship.
- Observed and assisted senior team members with daily technical tasks.
- Gained hands-on exposure to industry tools, workflows, and best practices.
- Built foundational knowledge in programming (React and JavaScript)

PORT OF TAKORADI (Software Developer Intern) NOVEMBER 2025 – DECEMBER 2025

Takoradi, Ghana

- Collaborated with a team of developers to build an Intern Tracking System using Django, contributing to both backend logic and feature implementation.
- Gained hands-on experience with real-world software development workflows, learned new tools and best practices, and improved my skills in Python/Django and team collaboration.

PROJECTS AND COURSEWORKS

Church Management App – Semester Project (Front-End Developer).

- Collaborated with my course mates and developed a church management app to manage members, events, and donations using React.
- Implemented responsive UI components and interactive dashboards to enhance user experience.

Clothing E-Commerce Website (In Progress)

- Building a responsive e-commerce platform for ladies' outfits using React and TypeScript.
- Created product listing, filtering, and carousel features to optimize the shopping experience on all devices.

Tertiary Link (In Progress) -Front-End Developer

- Developing a platform for secondary school students to explore universities, learn about courses, and understand admission requirements using React.

Inter Tracking System

- Contributed to building a system to manage and monitor student internships, track progress, and generate reports, improving internship oversight and organization.
